

STEP BY STEP HOW WE CREATE AMAZING WOOD SIGNS

Raspadesign

logos, metal and wood signs

LOGO DESIGN

Design original logos is what we do for 20 years. Experience and knowledge in communication is one of our competencies.

1

CHOOSE THE RIGHT WOOD

Pochote, cedar or other soft woods with a beautiful natural design are our preference being careful of cracks or natural holes.

2

BUILDING SIGN

Cutting, assembling and gluing the wood is an accurate woodcraft work.

3

SANDING

Make a perfect wood plan to start to work on it.

4

DRAW LOGOS ON WOOD

Carbon paper or a projector for a perfect reproduction of the logo.

5

SIGN SHAPE

Give a particular shape to sign will give more visibility and original beauty.

6

CARVING

Router carving is the most visible effect on the sign, when the project is detailed or small we use chisels and gouges.

FINE CARVING AND SANDING

Using different cutters and sandpaper, a lot of sandpaper, we finish the carving process and the details.

8

ANTI BUGS TREATMENT

At this point we treat the wood with an anti-bugs product to protect it from attack by insects.

9

BASE PROTECTION OR PRE-PAINT

Different projects can have a part of the natural wood color in the background or all varnished wood.

To protect the wood, and give the paint a more effective visibility and best color results, we use a transparent protective paint or a white paint base.

PAINTING

The colors are the final part of the sign. We give several coats of paint to achieve the perfect color effect.

STRUCTURE AND INSTALLATION

Build wooden structures or metal for the sign and their installation is the final part of our work.

1 2

METAL SIGNS

We also produce amazing metal signs also backlit for a modern vision.

LIGHT SYSTEM

We design and realize wired lighting systems using Led neon or Led Strips controlled by remote control or via wi-fi for smartphones and tablets.

Many years of Italian design experience and manual work, gave me
knowledge to complete this passion with heart, mind and labor.
Now what you need is in my hands.
